1.ORGANISATIONAL OVERVIEW

WEBSITE CHOICE

NAME: BJW PLUMBERS AND PROJECT PTY LTD

ORGANISATION DESCRIPTION:

BJW Plumbers and Project is a company that deals with various labor work that is needed by communities, big buildings, /smalls, and in rural areas.

We are mostly dealing with plumbing which includes (bathroom making, bathroom renovation, shower installation, Pump installation, Bow hole, Septic tanks, Geyser installation, Drainage system, Leak detection and more. Our clients need more of our services according to their needs.

Our target audience is communities, companies from rural and urban areas that require our services.

REASON FOR CHOOSING THIS ORGANISATION

Plumbing is in demand. Almost everywhere plumbing is needed. There are many opportunities in the plumbing and related sectors. The service we provide is needed by many, but there are challenges for our clients in finding the right plumbing companies or a registered plumber, even for emergency work. Such as blockage, leak tubs, pipe basting, and more. BJW PLUMBERS AND PROJECT PTY LTD aims to create a website for easy access online for the services we provide, without going around searching for people. Also, it is a trusted and registered company that also issues a COC (certificate of compliance) with a guarantee for a specific time.

Mission Statement

To provide reliable, affordable, and professional plumbing services while ensuring customer satisfaction and quality workmanship.

Vision Statement

To become one of South Africa's most trusted plumbing and maintenance companies through innovation, professionalism, and excellent customer service.

2.WEBSITE GOALS AND OBJECTIVES:

The website will benefit the company a lot because clients mostly trust websites with easy access, friendly users and the whole world is going digital in that way, our website will ensure our clients gets the right services they request, also get assisted online with

questions they might have before we book a call out or actual work. Those are the steps to make this company successful and visible for everyone to see how recommended we are to our clients will also be displayed on our sites. You will also get the opportunity to review as well, based on the service we provided on your project.

The website can help our company reach more clients in South Africa. It can increase visibility and make it easier for potential clients to find us online.

Key Performance Indicators (KPIs)

3. CURRENT WEBSITE ANALYSIS

3.1 STRENGTH

- The website contains all essential pages (Home, About, Services, Contact, Login).
- Users can request quotations through the quote form.
- Contact information and Google Maps are provided.
- JavaScript validation improves user interaction.
- Navigation is simple and easy to understand.
- Images and company branding are included.

3.2 AREAS OF IMPROVEMENTS

- No online booking system.
- No customer reviews section.
- No WhatsApp button.
- No search function.
- Limited SEO optimization.
- No emergency call-out form.
- Navigation layouts could be more modern.
- No social media integration.

4. WEBSITE FEATURES AND FUNCTIONALITY

Core Pages

Home Page

- Company logo and slogan.
- Company introduction.
- Free quote button.
- Quote request form.

About Page

- Company overview.
- Mission and Vision.
- Company information.

Services Page

- Bathroom renovations.
- Geyser installation.
- Leak detection.
- Septic tanks.
- Drainage systems.
- Borehole services.

Contact Page

- Contact form.
- Email and phone number.
- Google Maps location.

Login Page

- Login and registration forms.

Functionality

- Responsive design.
- Form validation using JavaScript.
- Interactive service cards.
- Smooth scrolling effects.
- Automatic footer year update.
- Success messages after form submission.
- Image preview functionality.

5. DESIGN AND USER EXPERIANCE

Design Style

The website uses a modern and professional design intended to create trust and make it easy for customers to request plumbing services.

Colour Scheme

COLOUR	USAGE
Blue	Navigation and Headings
White	Background
Grey	Content section
Orange	Button and call-to-action

Typography

- Headings: Arial Bold
- Body Text: Arial
- Buttons: Bold uppercase text

User Experience Considerations

- Mobile-friendly layouts.
- Simple navigation menu.
- Easy access to services.
- Quote request forms improve customer interaction.
- Contact information is visible on all pages.
- Fast loading pages.

- Fix bugs.
- Optimize performance.

Week 16–18: Deployment Phase

- Upload project to GitHub.
- Publish website.
- Perform maintenance and updates.

8. BUDGETS: ESTIMATES

The following budget estimate is based on current South African web development and hosting prices. The website is designed for BJW Plumbers and Projects PTY LTD and includes development, design, hosting, testing, and maintenance. Typical South African business websites range from approximately R5,000 to R20,000, depending on complexity

CATEGORY	DESCRIPTION	ESTIMATED COST(ZAR)
Research and Planning	Content planning and website structure	R1 500
UI/UX Design	Colours, Layout, Typography and responsive design	R2 500
Front-End Development	HTML, CSS and JavaScript development	R4 000
Responsive Design	Mobile and tablet optimization	R1 200
Forms and Validation	Quote form, Login form and contact validation	R1 000
Google Maps Integration	Contact location integration	R500

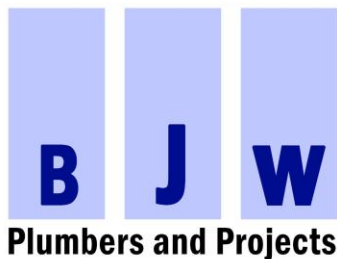

Testing and Debugging	Cross-browser and device testing	R1 000
Domain registration	. co.za domain(1year)	R150
Hosting	Shared hosting package (1year)	R1 200
SSL Certificate	Website security certificate	Free (Let's Encrypt)
SOE Setup	Meta tags and pages optimization	R1 000
Maintenance and support	6 Months support and updates	R2 500
GitHub repository and version control	Source code management	free
TOTAL(ESTIMATED)	Budget	R16 550

Budget notes

- Domain registration costs approximately **R80–R150 per year**. Budget notes
- Shared hosting typically costs **R80–R300 per month**.
- Small business websites in South Africa usually cost between **R5,500 and R20,000**, while more advanced sites can cost much more.
- GitHub and GitHub Pages are free and can be used for version control and publishing.
- Ongoing maintenance after six months may cost approximately **R300–R800 per month**.
- Additional features such as online booking, WhatsApp integration, customer reviews, and payment gateways would increase the overall cost.

Improvements to Part 1

HTML IMPROVEMENTS

All pages

I fixed html contact navigation headers to be consistent, and they now start with capital letters also this applied on index, contact, about, login, and services.

I improved the website by making it more professional, responsive, user-friendly, and interactive through CSS styling and JavaScript functionality.

1. Home Page (index.html)

- Added a cleaner and more modern layout.
- Styled the company introduction section for better readability.
- Added a **"Get a Free Quote"** button.
- Improved spacing, fonts, and colours.
- Made images responsive on mobile devices.

JavaScript Features:

- Quote request form validation.
- Displays a success message after form submission.
- Smooth scrolling effects.
- Automatic footer year update.

Visitors can easily understand the company services and quickly request a quote.

2. About Page (Home.html)

- Better formatting of company information.
- Improved headings for Mission and Vision sections.
- Enhanced readability of long paragraphs.

JavaScript Features:

- Clickable image preview feature.
- Responsive image display.

Creates a more professional company profile and improves user engagement.

3. Services Page (services.html)

- Redesigned services into professional service cards.
- Added a responsive grid layout.

- Added hover effects on service cards.
- Improved spacing and section organization.

JavaScript Features:

- Service cards animate when hovered over.
- Improved visual interaction.

Services are easier to browse and look more professional.

4. Contact Page (contact.html)

- Redesigned contact form.
- Styled input fields, buttons, and labels.
- Improved Google Maps display.
- Better page layout and spacing.

JavaScript Features:

- Email validation.
- Prevents empty submissions.
- Displays confirmation messages.

Makes it easier for customers to contact the company and reduces form errors.

5. Login Page (login.html)

- Styled login and signup form.
- Improved form layout and appearance.
- Better spacing and alignment.

JavaScript Features:

- Password length validation.
- Success notifications for login/signup actions.

Provides a more professional membership registration experience.

6. Navigation Menu (All Pages)

- Consistent navigation design across the website.
- Added hover effects.
- Mobile-friendly navigation layout.

Users can move between pages easily and consistently.

7. Header Improvements (All Pages)

- Professional company branding section.
- Better logo sizing.
- Improved company title and slogan display.
- Consistent blue company theme.

Strengthens the company identity and makes the site look more trustworthy.

8. Footer Improvements (All Pages)

- Fixed footer styling issues.
- Added proper spacing and alignment.
- Improved colours and readability.
- Added automatic copyright year.2026

Provides a cleaner professional finish to every page.

9. CSS Improvements

- Responsive design for phones, tablets, and desktops.
- Modern colour scheme.
- Improved typography.
- Better image handling.
- Professional form styling.
- Consistent spacing throughout the website.

The website looks modern and works well on different screen sizes.

10. JavaScript Improvements

Features Added:

✓ Form validation

✓ Email validation

✓ Password validation

✓ Quote request handling

- ✓ Smooth scrolling
- ✓ Image preview popup
- ✓ Hover animations
- ✓ Success messages
- ✓ Dynamic footer year

Makes the website interactive and improves the user experience.

Overall Result

The website was transformed from a basic static website into a **responsive, professional plumbing company website** with:

- Modern design
- Better user experience
- Interactive forms
- Responsive layouts
- Improved navigation
- Professional service presentation
- JavaScript validation and effects
